EDUCATION

University of Michigan, B.S. in Computer Science, GPA: 3.70 / 4.0

Expected December 2027

Relevant Coursework: Introduction to Artificial Intelligence, Data Structures & Algorithms, Software Engineering, UI Development

Affiliations: Management Leadership For Tomorrow, **Dean's List**, National Society of Black Engineers, ColorStack @ UMich

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, JavaScript, SQL, HTML/CSS

Frameworks & Tools: Flask, Vercel, Convex, Git, GitHub, Google Cloud, OAuth 2.0, SQLAlchemy, Gmail API, Gemini API

WORK EXPERIENCE

Georgetown Data Science Corps

Washington, DC

Data Science Research Intern | Python, Machine Learning, Data Analysis, Model Evaluation

Jun 2026 – Aug 2026

- Built and evaluated machine learning models on large-scale single-cell datasets containing over **1.1 million records** using Python.
- Developed and optimized supervised classification pipelines, improving **multiclass model performance** through ensemble learning techniques.
- Applied dimensionality reduction and clustering techniques to identify patterns across large-scale datasets.

SEO Tech

Remote

Software Engineering Intern | Python, Flask, JavaScript, Git, REST APIs

Jun 2026 – Aug 2026

- Built **PlanGuard**, a full-stack study planning application using Python, Flask, SQLAlchemy, JavaScript, and SQLite.
- Implemented secure authentication, REST APIs, assignment management, and an explainable priority-scoring engine.
- Created **62 automated tests** covering authentication, API routes, validation, user isolation, and application security.

Software Engineering Intern | Python, Pygame, Data Structures & Algorithms, HTML/CSS

Feb 2025 – Aug 2025

- Designed and implemented a desktop game using Python and Pygame within an Agile development team.
- Collaborated with teammates to test, debug, and improve application reliability and performance.

Lombardi Comprehensive Cancer Center

Washington, DC

Data Science Intern | Python, SQL, Git, AI

Jun 2023 – Aug 2023

- Performed metabolomics data analysis using **METLIN** and **XCMS**, reducing processing time by **50%**, improving accuracy, and identifying **2** potential biomarkers.
- Presented weekly findings to Dr. Cheema and research team, driving improvements in experimental protocols and increasing lab efficiency.

OmicsCraft

Washington, DC

AI & Software Engineering Intern | Java, Git, AI

Jun 2022 – Aug 2022

- Contributed to development of **AI-powered bioinformatics platforms**, collaborating with researchers to support metabolomics and multi-omics analysis.
- Conducted software testing across **3** toolkits, identifying **2** critical bugs and improving system accuracy and reliability.
- Evaluated product usability and generated detailed user reports, informing redesign decisions for **2** platform features.

PROJECTS

GmailAI | Python, Flask, JavaScript, Gmail API, Gemini API, OAuth 2.0

- Built a **full-stack AI-powered inbox organizer** integrating **Gmail API** and **OAuth**, categorizing **40+** emails into **4** priority labels to help users identify opportunities **3×** faster.
- Integrated **Gemini API** to automate email summarization and urgency scoring, reducing manual inbox processing into a single prioritized dashboard.
- Designed and deployed a responsive UI with an AI chat interface supporting real-time interaction across **6+** components.

LEADERSHIP

Management Leadership For Tomorrow

Bethesda, Maryland

Member

Jan 2026 – Present

- Accepted into a selective 18-month program accelerating career growth through structured coaching, mentorship, and targeted skill-building with partner organizations including LinkedIn, Bloomberg, and Deloitte.
- Developed business and technical acumen through technical assessments, case studies, simulations, and project work to gain industry exposure into tech-talent pathways.

ColorStack @ UMich

Ann Arbor, MI

Academic Chair

Aug 2025 – Present

- Lead weekly **LeetCode** workshops for **25+ members**, coordinating instructors to teach **data structures, algorithms**, and technical interview problem-solving.
- Organize CS exam reviews and course-planning workshops, helping members strengthen technical skills and prepare for core computer science coursework.
